# App Marketplace - Self-provisioning Workflow - Coursera for Business

World-class training and development programs. Developed by top universities and companies. All on **Coursera for Business.** If your company uses **Coursera**, you can integrate your Coursera content into SumTotal Learn so your learners can access all their training in one place.

For more on Coursera, please check their website (www.coursera.org).

Configure and Activate Coursera Integration

From the SumTotal App Marketplace home page, find the integration connector app for **Coursera for Business**.

Hover over the listed **Coursera for Business** app and click **More Info** to navigate to the Coursera app details page.

The **Coursera for Business** app details page provides several details, including an overview, a link to the installation guide, pricing details, FAQs, and contact info to the SumTotal Marketplace Team.

From the Coursera app details page, click **Sign In To Install** to navigate to the **Login Page**.

Log in to the SumTotal Marketplace. If you do not have an account, please click on the link to create one.

On successful login to the Marketplace, the **Environment Setup** button appears.

Click **Environment Setup** to specify the environment for which you want to submit the installation request. The **Installation Environment** popup screen appears.

On the **Installation Environment** pop up:

- Enter the environment or site name.
- Enter the environment or site URL.
- Select the checkbox if you are an **EMEA** (Europe, The Middle East, and Africa) region customer.
- Select the checkbox to agree to the terms and conditions.

Click **Install**. This redirects you to the SumTotal URL entered for installation.
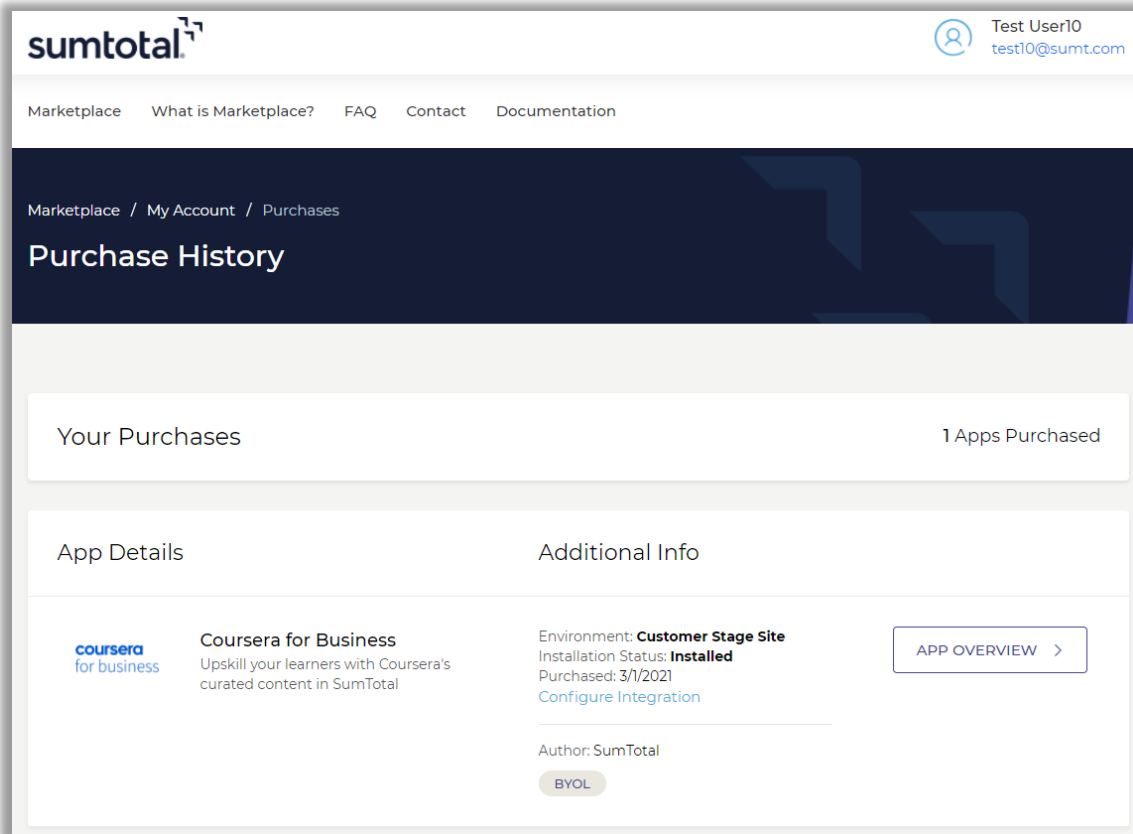

Enter the SumTotal Learning environment credentials.

Upon successful login to the environment, you receive a confirmation message that your installation request has been submitted.

Please wait for few seconds to complete the installation.

- **Purchase History –** Allows you to check all your purchase history. This page displays details for the apps installed, additional information such as environment name, installation status, purchase date, and a link to go back to the **Content Integration** page.

The **App Overview** button allows you to navigate back to the App Details page.
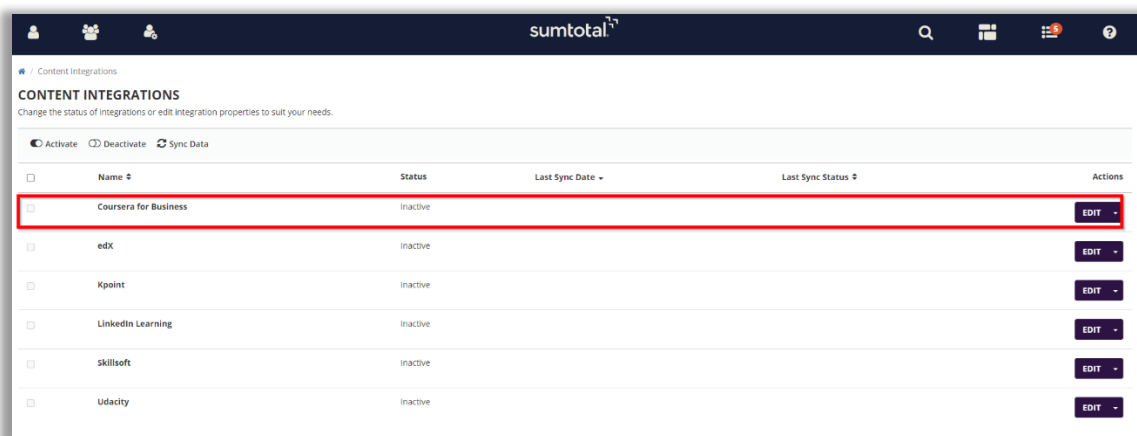

- **Configure Integration –** Enables you to configure the screen for integration.

  Click **Configure Integration** to navigate to the **Content Integrations** page under your current working domain. Ensure that you are in the *required domain* to configure the settings.
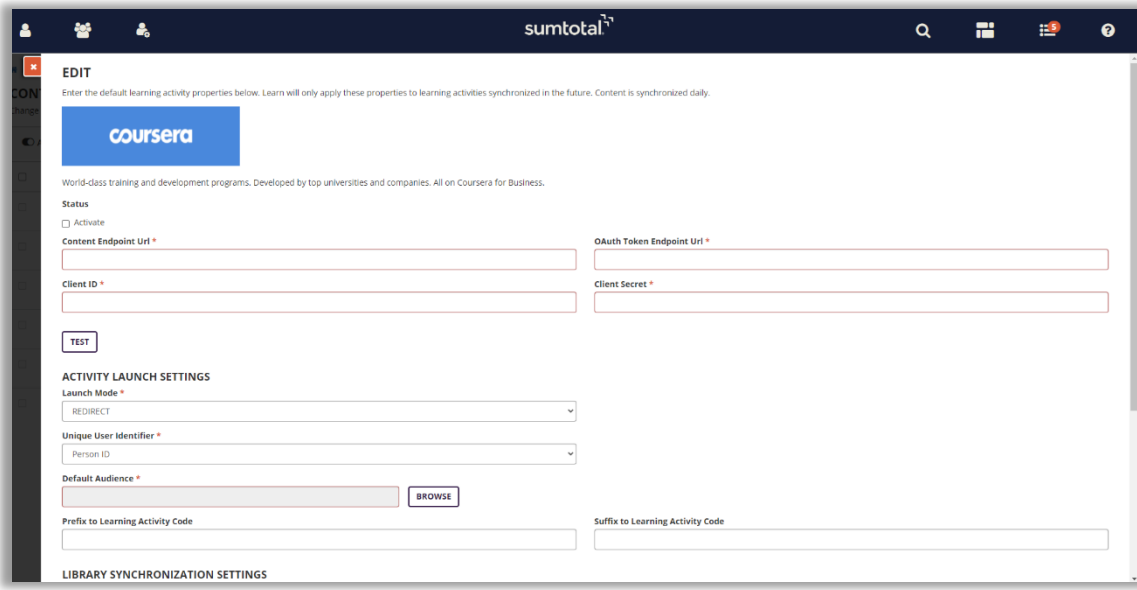

Click **Continue** to navigate to the **Content Integration** page.

The Content Integrations list page in the SumTotal environment will now display **Coursera for Business** entry created through Marketplace Self Provisioning. From here, you can edit integration properties as per needs.

Click **EDIT** alongside the **Coursera for Business** entry to open the Coursera Content Integrations Form Page.

Enter all the required details and then click **Save**.

You have now successfully created **Coursera for Business** entry in the Content Integration page and configured it.
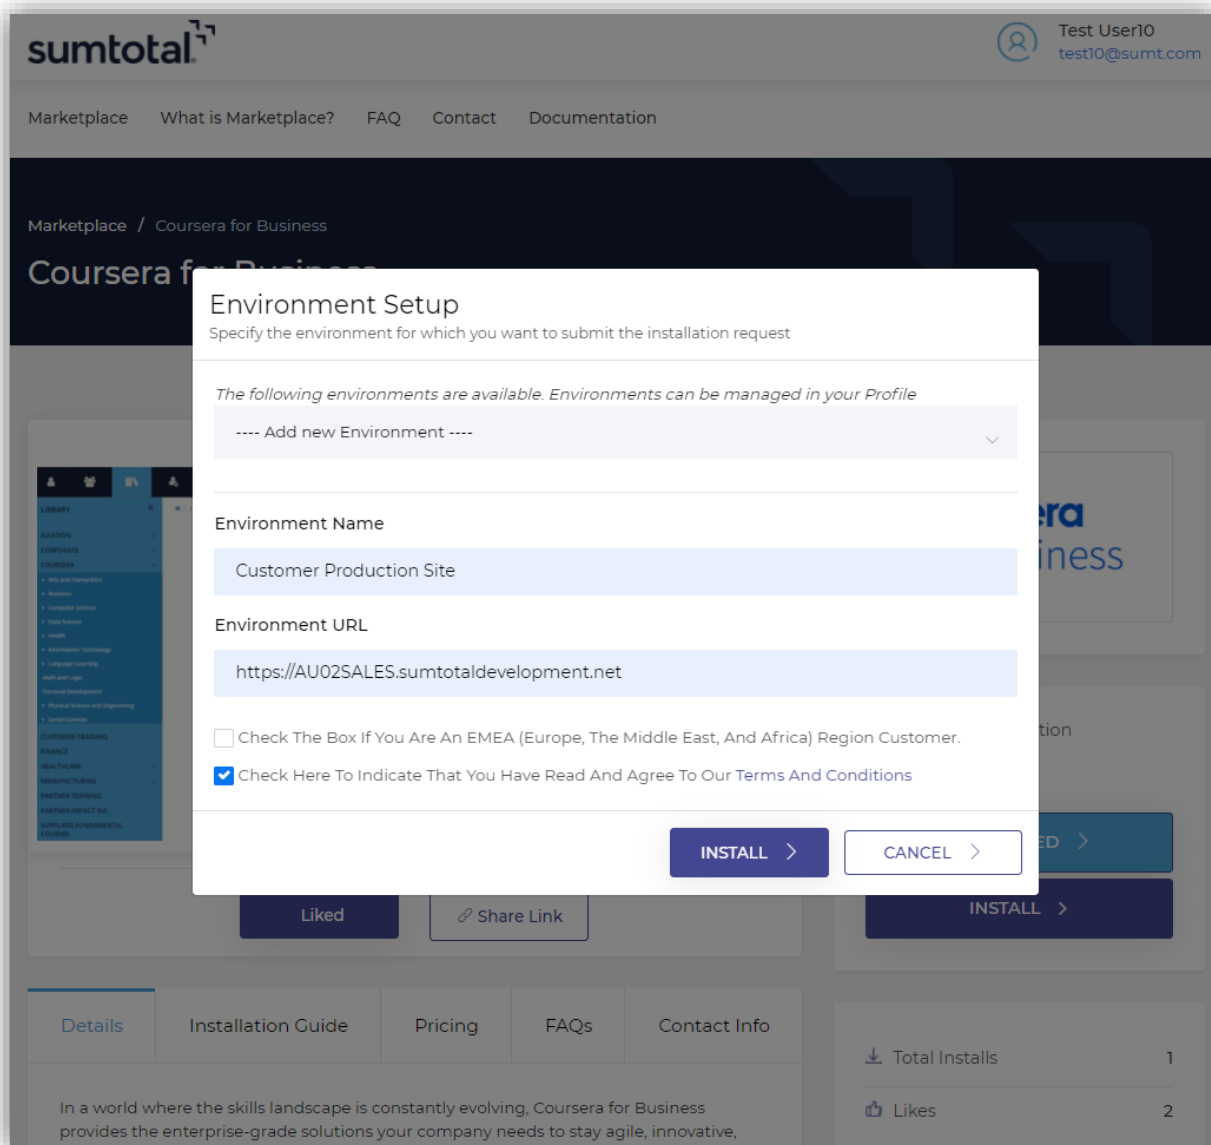

Do you want to integrate with other environments?

Please continue with the following steps to integrate Coursera for Business for additional environments (Dev/Stage/Production).

On the App Details page:

- The **Install** button enables you to add a new environment or install the app for any previously available environment.
- The **Purchase History** button shows details of all your purchases.

From the **Environment Setup** screen, please follow the steps as mentioned previously.
